ELECTRIC POWERED
Induction Cooking

ENERGYWISESM
Use less. Spend less. Do more.

Experience cooking technology that rivals the power of gas while providing greater efficiency, safety, and precision.

Induction cooking is one of the most efficient ways to prepare food. By generating an electromagnetic field below the glass surface, energy is transferred directly to the cookware on top. Unlike traditional electric or gas cooktops and stovetops, no flame or burner is necessary.

Benefits of induction cooking?

- Greater efficiency – up to 2½ times more energy is transferred into the food versus natural gas or propane.
- Greater safety – the cooking surface stays much cooler since there isn't a heated element. The low electromagnetic field has been deemed safe by the American Heart Association for patients with pacemakers or medical implants.
- Fast preheating – allows cooking more quickly.
- Precise temperature adjustments – reduces the chance of burning food.
- No combustion – no carbon monoxide or carbon dioxide, and reduced cooking fumes. Induction also produces less excess heat in the kitchen. This reduces ventilation requirements.
- Easier cleanup – spatters outside the pan will not bake onto the cooking surface. There are no burners to take apart and reassemble for a thorough cleaning.

Qualifying built-in cooktop or free-standing ranges must be brand new and purchased on or after January 1, 2022. The entire cooktop surface must use induction technology and have a 30" minimum width.

Complete application and submit application with proof of purchase to your electric utility provider. Program guidelines can be found at www.EnergyWiseNebraska.com. Participating utilities have the right to limit the quantity of incentives.

INDUCTION COOKING

Incentive application must be completed and submitted to your local electric utility along with the proof of purchase. Contact your utility with any questions.

- 20% incentive (30" minimum width of cooktop or range)
- Must be brand new and purchased on or after January 1, 2022
- Incentive amount is based on purchase price (installation, taxes, delivery/shipping are not eligible)

1. CUSTOMER INFORMATION:

Customer Name: _____ Utility: _____

Account #: _____ Phone #: _____

Installation Address & City: _____

Installation Address & City (if different than above): _____

2. EQUIPMENT INFORMATION:

Brand name: _____

Model # _____

3. INCENTIVE AMOUNT:

Price of equipment: _____ x 20% incentive = \$ _____
(installation, taxes, delivery/shipping costs are not eligible)

4. I ACKNOWLEDGE this information is in compliance with the program guidelines.
